

GOURAV DAS

AI/ML Engineer

Kolkata, West Bengal | gouravdas350@gmail.com | +91 89104 18563 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

PROFILE

AI/ML engineer with hands-on experience building a retrieval-augmented generation (RAG) document Q&A system using FastAPI, LangChain, and Google Gemini, and training supervised ML classifiers on two credentialed projects — an IIT Patna candidate-shortlisting assignment and a B.Tech final-year project. Currently deepening cloud fundamentals through AWS re/Start. Looking for an entry-level AI/ML or GenAI Engineer role.

TECHNICAL SKILLS

- AI/ML & GenAI: LangChain, Retrieval-Augmented Generation (RAG), Google Gemini API, FastAPI, scikit-learn, Prompt/Context Engineering
- Core CS: Data Structures & Algorithms, OOP, DBMS — actively practicing via NeetCode 150 (36/150 solved)
- Languages: Python, JavaScript (ES6+)
- Tools & Cloud: Git, GitHub, Linux, AWS (EC2, VPC, S3) — in progress via AWS re/Start
- Also exposed to: Big Data foundations (Hadoop, HDFS, Spark)

PROJECTS

RAG Document Assistant — FastAPI, LangChain, Gemini

2026

[Live Demo →](#)

- Built a retrieval-augmented generation (RAG) system with a modular FastAPI backend (app/core, app/models, app/services) for document-grounded Q&A over uploaded PDFs.
- Used PyPDF + RecursiveCharacterTextSplitter for chunking, LangChain to orchestrate retrieval with Google Gemini, and Pydantic-typed schemas served asynchronously via Uvicorn.

Fake News Detection — IIT Patna Candidate-Shortlisting Assignment

Jul 2026

[Live Demo →](#)

- Built a TF-IDF + Logistic Regression classifier following a stratified 70:10:20 train/validation/test split with fixed random seeds for full reproducibility.
- Achieved 98.57% accuracy, 98.63% F1-score, and 0.999 AUC-ROC on an unseen test set of ~9,000 news articles.

Heart Disease Prediction System — B.Tech Final Year Project

2024 – 2025

[Live Demo →](#)

- Built and evaluated 5 classification models (Logistic Regression, KNN, SVM, Decision Tree, Random Forest) on a structured medical dataset.
- Achieved up to 82% accuracy with Logistic Regression and Random Forest (100 estimators), the top-performing models.

Movie Recommendation System

2023 – 2024

- Built a content-based movie recommendation engine using Python, applying cosine similarity across the TMDb dataset of ~5,000 movies.

Additional project (Hadoop File System Management) on the portfolio site above.

TRAINING & INTERSHIPS

AWS re/Start Cloud Trainee — Tata Strive

Jun 2026 – Present

- Provisioning and configuring core AWS services (VPC, EC2, S3), Linux administration, networking, and IAM/security fundamentals through a structured, project-based curriculum.

Blockchain & Big Data Analytics Bootcamp — NIELIT Kolkata (Govt. of India)

Feb 2026

- 90-hour bootcamp covering blockchain fundamentals and Big Data technologies (Hadoop, HDFS, Spark, Hive); applied HDFS for storage and file operations on Linux.

Machine Learning Using Python — Ardent Computech Pvt. Ltd

Aug 2023 – Sep 2023

- Covered supervised/unsupervised ML algorithms, data preprocessing, feature selection, and model evaluation; built a recommendation system as capstone.

EDUCATION

B.Tech, Computer Science & Engineering — Future Institute of Engineering and Management (MAKAUT)

2026

- CGPA: 7.56

Higher Secondary (Science), Kendriya Vidyalaya Fort William, Kolkata (CBSE) — 2021 | 76.00% • Secondary — 2018 | 61.20%

CERTIFICATIONS

- Machine Learning Using Python — Ardent Computech • Blockchain & Big Data Bootcamp — NIELIT Kolkata
