PROJECTS

E-Commerce Web Application — Full-Stack (MERN)

2026

[Live Demo →](#)

- Built a full-stack MERN platform (40+ REST endpoints, 11 route modules, 8 MongoDB collections) with JWT auth, OTP verification, password reset, and RBAC across admin/seller/buyer roles.
- Integrated Stripe and Razorpay payments, an admin dashboard for user/product/order management, and catalog features including filtering, reviews, and similar-product recommendations.
- Hardened the API with Helmet, CORS, rate limiting, bcrypt, and input validation.

FinPulse SaaS — Next.js, React 19, Neon, Drizzle ORM

2026

[Live Demo →](#)

- Built an enterprise multi-tenant financial analytics and real-time collaboration platform (live market asset tracking, collaborative portfolios, white-labeled client portals) using Next.js 16 App Router with React 19 Server Components/Actions, Neon serverless PostgreSQL + Drizzle ORM, and Clerk auth with Svix webhooks.

Heart Disease Prediction System — B.Tech Final Year Project

2024 – 2025

[Live Demo →](#)

- Built and evaluated 5 classification models (Logistic Regression, KNN, SVM, Decision Tree, Random Forest) on a structured medical dataset.
- Achieved up to 82% accuracy with Logistic Regression and Random Forest (100 estimators), the top-performing models.

Additional projects (Hadoop File System Management, Joke Generator app) on the portfolio site above.
